Brackenmere | business fleet briefing

Fleet planning across Manchester, Leeds and Birmingham.

Tell us how the vehicles will be used, how many are needed and when each stage should arrive. A phased replacement can involve cars and vans across more than one location.

Indicative requirements can range from £25,000 to more than £100,000. Final price, specification, tax treatment and availability must be confirmed for the individual requirement.

Our business is vehicle sales. Technical and parts colleagues handle existing vehicle questions separately. A brochure is information, not an insurance or finance product.

Start a cross-branch requirement with Megan Ali, Fleet Account Director, Manchester.

megan.ali@kangaroo-r7m426.xyz

For existing vehicle service coordination: Lewis Collins, Customer Services Manager, Manchester.

lewis.collins@kangaroo-r7m426.xyz

No guaranteed delivery date, vehicle range, payload, warranty or credit approval is stated in this briefing. Ask the relevant team.
